

Saratoga Grasso Trasparente al Silicone – Transparent Silicone Grease

Saratoga Grasso Trasparente al Silicone – Transparent Silicone Grease is a clear translucent, waterproof, inert lubricating paste, which resists temperatures from -35 to over + 300°C.

Thanks to its characteristics of being waterproof, resistant to wash out, adhesion, duration and transparency, it is the most suitable product for all those uses that require an exceptionally "fine" grease.

APPLICATION FIELDS

Saratoga Grasso Trasparente al Silicone – Transparent Silicone Grease is inert towards all materials and is therefore the only product that can be applied on rubber and plastic gaskets to increase their duration and grip; as well as on taps, marine winches, precision mechanisms, office machines and printers, household appliances and power tools, battery clamps, irrigation systems, electro-medical machines, industry (electronics, food, vacuum), lubricant for glassware and many more.

Specific data
