

## Saratoga Self-Amalgamating Tape

Saratoga Self-Amalgamating Tape is an insulating, self-amalgamating tape based on EPR.

### APPLICATION FIELDS

Saratoga Self-Amalgamating Tape stops and seals water leaks from pipes and sleeves made of metal, rubber and many plastics. Electrically insulates cables and electrical components, protecting them from water. Can also be used in agriculture for plant grafts.

### APPLICATION

- Remove the white separating liner.
- Stretch well the self-amalgamating tape until it reduces by 2/3 of its original width.
- Unroll and apply the tape on the surfaces involved.
- Apply tape layers with 50% overlap.

Specific data	
Tape colour	black
Liner colour	white
Total thickness	0,5 mm
Width	10 m
Length	19 mm
Tensile strength	3 MPa
Elongation at break	900%
Operating temperature	From -40 to +100°C
Dielectric strength	44 kV/mm

### STORAGE AND SHELF LIFE

In unopened original packaging, between +10/30°C.

Protect from dust, heat, moisture and direct sunlight.

### CAUTIONS

Keep out of the reach of children.

Consult Material Safety Data Sheet for full list of hazards and the directions on the product label itself.
